

Productdatasheet

Access floor pedestal M20

Operational area:	access floor
Range of adjustment:	support height from 185 to 1205 mm
Material:	steel
Refinement:	galvanized, blue passivated
Load level:	4
Packing:	boxes

Head part

Dimension of the head plate:	90 mm arranged in star shape, strength 3,5 mm
Thread bolt:	M20 with nut and secure nut
Material adding of the head part:	centrically round welded

Bottom part

Dimension of the bottom plate:	98 mm circular, strength 2,5 mm
Dimension of the support tube:	precision steel tube 24 x 2 mm
Material adding of the bottom part:	hydraulic pressed

Test results according to DIN EN 12825 access floors

Load level:	4
Nominal point load:	4 kN
Safety point load:	8 kN
Failure load:	> 18 kN
Safety factor:	> 4,5
Testing institute:	Testing institute of floorsystems, Aalen - Germany
